

K-Love is locally broadcast from an FM translator. With its contemporary Christian format, it provides a popular and uplifting message. Its continued broadcast is potentially threatened by the proposed Low Power FM service since the LPFM may get priority. K-Love is the only station nearby with their type of programming available, and I believe it is in the public interest to ensure that its broadcast be permitted to continue. Giving LPFM priority in broadcast frequency would deteriorate the quality of FM programming available in my locality and would do the public a disservice.

Thank you for the opportunity to comment.
